✓ Commercial/Domestic Use

E-Compact 250DI - Van or Trailer Mounted.

Designed to fit all compact vans and trailers, the Brodex E-Compact 250 litre De-Ionisation System is part of the latest generation of window cleaning equipment. Built for professional window cleaners from high-impact polypropylene, with quality components throughout. A great entry-level system for beginners, particularly suited to domestic or light commercial use.

This model produces Pure Water quickly through a resin-based filtration system, removing impurities, calcium, magnesium and minerals and is suitable for soft water areas. The maintenance is very low and the consumables are simple and quick to change.

- Uses a vertical resin system, which is 80% more efficient than horizontal resin vessels
- Allows for 2 operators at once, thus increasing your profits.

You may wish to consider the RO alternative, since although at a higher initial cost, the RO has significantly lower running costs than the DI, due to greatly increased resin-life - often as much as 20 times. So, even in soft water areas, it is better value in the long run.

Summary: Built-for-purpose. Fast and easy to use, with low running-costs and very fast 'pay-back'. Our Trade-In option makes investing in this system one of the best decisions you will ever make.

- Why go anywhere else?.

100% Safety Record

Our systems are securely mounted, using our steel Tanksafe Bracket, to and *through* the floor to the chassis of your vehicle for absolute safety. We always recommend that you install a steel bulkhead for the safety of driver and passenger in the event of a head-on collision.

Frost Advice:

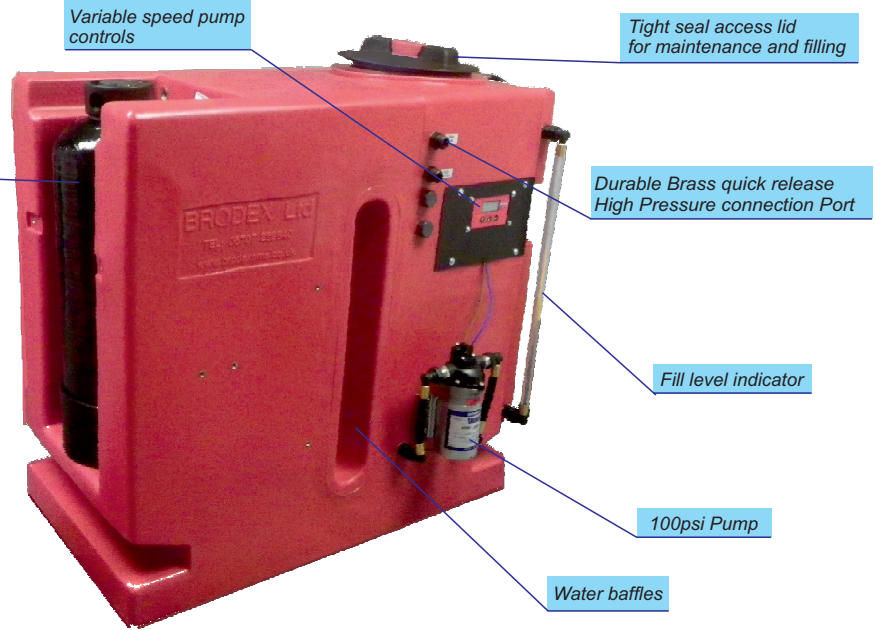

Avoid letting your system freeze, as this may cause expensive damage, resulting in items needing replacement.

Brodex Benefits:

- Very low maintenance*
- Negligible running costs*
- Easy to use*
- Lifetime customer support service*
- Free demonstration*
- Try-before-you-buy*

We give you a supply of promotional leaflets for your customers, to ease the transition from ladders to WFP.
