

## EcoTrolley

### PURE WATER CLEANING SYSTEM

The Brodex EcoTrolley is a versatile 50 litre carrier, designed to transport water from your system to jobs where access is a problem, or to simply add another operator to your setup.

#### KEY POINTS

- Water fed pole system
- Quick release, leak free, quality brass fittings
- Tough polypropylene material
- 100% ready to use with integral 100psi pump
- 12v power supply
- Variable Speed Digital Controls

## EcoTrolley - Portable System

### Increase Productivity, Efficiency and Profits

The Brodex EcoTrolley is part of our portable cleaning systems range, designed to transport pure water to areas out of reach from your van mounted system.

Built to our exacting standards, it has a tough polypropylene body, yet is light and manoeuvrable. It comes complete with battery, charger and a 100psi pump, with variable speed digital controls.

All fittings are quick release, for ease of use and hard-wearing, leak free brass rather than plastic, for increased durability.

Simply adding the appropriate chemicals enables you to clean brickwork, cladding or signage. It is also useful as a pre-treatment unit filled with citric acid solution or detergent.

#### Brodex Tip:

We recommend fitting a trigger to your water fed pole, to conserve water and save on refills.

The EcoTrolley is built for purpose, fast and easy to use. With low maintenance and negligible running costs, investing in this system will be one of the greatest upgrades to your water fed cleaning setup.

Please note - The EcoTrolley does not purify water, it is designed to carry water from your pure water generator.

Fully compatible with Brodex Water Fed Poles.

- **Capacity:** 50 litres
- **Fill-time:** 5mins (based on 50psi mains pressure)
