

PortaPower

PURE WATER PURIFICATION SYSTEM

An ideal stand alone or add on system to your current business, which uses RO and DI technology to deliver 200 litres per hour of pure water for window cleaning.

KEY POINTS

- Water fed pole system
- Rapid 200 litre per hour water production
- 60-70% of input water is product (reducing waste)
- No need to purchase a van
- No chemicals or detergents
- Low cost pure water cleaning

PortaPower - Portable System

A portable, high production rate, Water Purification System.

This system allows you to produce and deliver large amounts of de-ionised water on-site. Simply connect to the mains water and electricity supply on-site and you are ready to work instantly.

Safety First

The PortaPower supports the long reach cleaning option (60ft working height) so no need to hire in expensive access platforms and scaffolding. Connect your water fed poles directly to the PortaPower and you are ready to go.

Faster

The PortaPower is compact and can be moved around quickly, in and out of vehicles, up and down steps and across any terrain. Saves you time as there is no need to pre-fill a tank and you can stay on-site until the job is done.

Going Green

No detergents are used in the purification process. Pure Water Cleaning is all you need for a top class professional finish.

Saving You Money

PortaPower is a stand alone system which is compact and can be transported in an existing small van, or even an estate vehicle. No need to purchase a van or pay installation costs, making it the most cost effective model on the market today.

SAFETY WARNING

Use an RCD device at power source to protect operator from potential electrical shock. This unit is not designed to run in wet conditions, so ensure it is kept dry at all times.

- **Weight:** 41kg Mains - 61kg Battery*
- **Dimensions:** H 135cm x D 48cm x W 56cm
- **Consumables:** 10" Sediment Carts - 6 monthly change
